How to update the firmware in the Digi Wi-Point 3G

Then browse and select the firmware file that you down loaded from Digi's Support site.

Click on the **Upload firmware**.

How to update the firmware in the Digi Wi-Point 3G

You will then be presented with a Verify Upgrade firmware splash screen.

Click on **OK**.

The firmware will then upload to the Digi Wi-Point 3G and when it's finished it will reboot the unit.

How to update the firmware in the Digi Wi-Point 3G

When the unit reboots and comes back online after about 60 seconds you can verify the upgrade by going to **System Information** in the **Administration** menu in the WebUI.

The screenshot shows two overlapping browser windows. The top window displays the 'Upgrade Firmware' page, and the bottom window displays the 'System Information' page. The 'System Information' page is titled 'System Information' and has a 'General' section. It lists the following details:

Model:	Wi-Point 3G
Ethernet MAC Address:	00:40:9D:33:65:44
Wi-Fi MAC Address:	00:40:9D:33:65:45
Firmware Version:	v1.1.28-24 (Built on Feb 29 2008 17:05:23)
Boot Version:	1.0.6 (Built on Jan 29 2008)
CPU Utilization:	11%
Memory Utilization:	45% [5996K/13552K]

Below the system information, there is a 'Refresh' button and a navigation menu with options for Network, Mobile, and GPS. A callout box points to the 'Firmware Version' field with the text 'New firmware shown here'.

Your unit has been updated.
