

IMPORTANT! PLEASE READ ME FIRST

Thank you for buying a Digi Development Bundle!

This package contains two unique products: a ZigBee RF Module Development Kit and a Device Cloud by Etherios™ Gateway Development Kit. We encourage you to open each box and go through the step by step instructions. Each kit will help you learn about the features and benefits of the technology within.

Once you have completed each separate kit, we invite you to see how the kits can work together by following this link:
