

PRODUCT NOTICE # 110901

Date:

September 1, 2011

Product:

XBee Development Kits

Notice:

On Sept. 1, 2011 Digi updated some previously released development kits in order to improve the customer experience and reduce waste. Some of the accessories in multiple XBee development kits were removed. In addition, all RS232 XBee interface Boards were replaced with USB XBee Interface Boards. New revisions will be in stock and begin shipping immediately.

Reason for Change:

Some accessories were changed or removed because they were out of date and no longer accurate; others were never used in the development kit experience.

Details:

Accessories that were removed include an installation CD, 9V battery, battery clip, RS232 XBee Interface Board, RS232 cables and adapters, and printed inserts. The quantity of XBee modules and the overall development kit experience was not changed.

Channel partners should use up existing inventory, no stock rotation necessary.
